CM Elahi notices

The firing incident that occurred near PTI Chairman Imran Khan's container in Wazirabad has been noted by Punjab Chief Minister Parvez Elahi, who has asked the provincial IGP to submit a report following a comprehensive inquiry.

Who is Responsible?

It is now unclear who is to blame for this tragedy or whether Imran Khan would carry on with his long march or make another choice. But it demonstrated that the perpetrators of the act were genuinely afraid of Imran Khan. However, there are now a lot of questions regarding the security services and intelligence organizations, including whether they knew about the occurrence or why they didn't want to secure the former prime minister Imran Khan. Arshad Sharif was also murdered a few days ago in Kenya, although the cause of death is still a mystery.

But it is obvious that whoever is behind these incidents is very afraid of the PTI, and the PTI leaders may be going to expose something significant. As an investigative journalist, Arshad Sharif exposed the corruption committed by the ruling elite in Pakistan over the past many years. Despite all the difficulties facing the nation, concerns about the intelligence service and the current government have arisen. A few days ago, neither Imran Khan's safety was revealed during a conference between the DGISI and DGISPR. The recent attack on Imran Khan and Arshad Sharif's assassination demonstrates that there is serious activity going on behind closed doors, but it is unclear if the perpetrators will be identified or not.
